A WINNING PRODUCT

Pro Mound is the choice of the Miami Marlins for their new stadium that opens spring 2012.

PROmound[®] PACKING CLAY

No baseball field is complete without properly installed batter's boxes and pitcher's mound. Pro Mound alleviates common wear problems created by hitters and pitchers. This unique blue gumbo packing clay is used to form a solid subsurface when building these areas, allowing players to "dig in" and establish footing without leaving large holes. It is highly durable, helps reduce maintenance, and gives players more solid footing season after season. Preferred by groundskeepers and coaches at all level of the game, Pro Mound is a valuable addition to every field.

PROmound[®] PACKING CLAY

Pro's Choice Pro Mound provides an excellent subsurface for a pitcher's mound and batter's box. Easy to install and lasts season after season, Pro Mound can add drastic improvements to every field from the rec leagues to the pros.

To Apply to Infields:

1.

Step 1: Remove the top 4-6 inches of infield.

2.

Step 2: Lightly water and allow to soak in.

Step 3: Apply 1" Pro Mound and tamp to compact.
Repeat steps 2-3 to within 1/2" of finished grade.

3.

Step 4: Cover with infield mix, tamp and finish with Pro's Choice infield conditioner.

4.

Long-Term Benefits and Maintenance:

Once Pro Mound is properly installed, it is there for the life of your field. Minimal maintenance will then be required on the substructure of your pitcher's mound and batter's boxes. Sweep out divots made in the Pro Mound and use a rake to level off high spots. Moisten the area to be repaired. Fill the divots with Pro Mound and tamp firmly. Finally, cover with infield soil and tamp again.
